

CoStar Has Verified Information!

What does “Verified” Mean?

- Verified means you get accurate, up-to-date information because our research team – over 750 strong – tracks over 1.6 million properties in 57 major U.S. markets on a 30-day cycle.
- Verified means you won’t waste your time on stale listings because, in CoStar, listings that are no longer available are removed.
- Verified means you’ll have peace of mind knowing that unconfirmed information is deleted and hype is eliminated.
- Verified means you’ll have confidence in your reports and presentations because no one works harder than CoStar to provide you with the most current, comprehensive and accurate commercial property information available.

CoStar checks, double checks and crosschecks to make sure that any changes to properties, spaces or tenants are captured in our database. When a prospective client calls and asks about a building on the market, you’ll be able to look that property up in a matter of seconds, and be sure that what *you* see is what *they’ll* get!
